Configuration:

Please select one of the below IP configurations

One public IP

- . One device will be configured with one real fixed IP. This device can be accessed from the Internet.
- . Recommended if you have a VPN application or a mail server.
- . Connection sharing (Router or PC server) must be used to provide connectivity to other PCs on your network.

Five private IPs NATed to one public IP

- . Up to Five PCs can be configured with private IPs without the need for a router or a server. Additional PCs can be connected using a router or a server.
- . The configured PCs are not reachable from the Internet.
- . Recommended for standard Internet applications (browsing, emails, chatting etc...)
