What's WiFi Access?

WiFi (wireless fidelity) is the technology used as the “wireless connection” allowing you to access the Internet without "plugging in" a physical wire. You can take your computer to an airport, a café, a hotel, a convention center. **WiFi** lets you connect to the Internet where you are - at speeds up to 20 times faster than dial up.

What you need to Get Started?

- A Laptop or pocket pc or any handled device “PDA” with WiFi 802.11b wireless capability built-in
- An IDM WiFi Subscription Plan or prepaid card available at any HotSpot deployed and managed by IDM.
