D-Link DWR-921

• Connect a device to your router using an Ethernet cable or Wi-Fi and the default Wi-Fi key is written on the backside of router

- Open your web browser and type the default IP Address in the address bar 192.168.0.1
- You should now see the router login page with 2 text fields where you can type router's username and password
- Type Username admin and Password admin or keep password blank then click login

	D-Link
Username : admin Password :	
Login	

- To modify wireless settings click Wi-Fi on the top middle of interface then go to Wi-Fi Settings on the left side
- In Wireless Network Name textbox type the new Wi-Fi name
- Make sure Security mode is WPA-Personal and WPA mode is WPA2 only
- In Pre-Shared Key type Wi-Fi password (safest passwords are long and contain at least 8 digits of mixed letters, number)
- Click Apply to save changes
